

# AI Studio

Your Data. Your Rules.  
Your AI.

AI Studio, part of BillingPlatform's RevenueIQ AI suite, empowers finance teams to deploy pre-trained models or create their own—aligning AI with your unique data, configuration, and processes. From natural language reporting to anomaly detection and predictive forecasting, it delivers AI that works the way your business works.

## Key Benefits

Create and train AI models based on your unique data, workflows, and business structure

Ensure AI-powered insights and automation are highly relevant and accurate

Move beyond generic AI outputs with deep personalization

Future-proof your AI investment with ongoing training and refinement

# Core Capabilities

## AI Built for Your Business

AI Studio empowers you to tailor artificial intelligence to how your organization actually operates. Create and adapt models to align with your unique business structure, data, and workflows, ensuring outputs are not only accurate but grounded in your operational reality. Whether you're supporting natural language reporting, forecasting revenue, or surfacing deep financial insights, AI Studio ensures AI works the way your business works, adapting to your processes, not the other way around.

### Key Features

- ✓ Align AI with your business processes and rules
- ✓ Build or refine models for your unique revenue lifecycle
- ✓ Ensure insights are grounded in your operational reality

## Use AI to Automate What Matters Most

With AI Studio, your team can move beyond one-size-fits-all AI solutions. Configure automation around the specific rules, processes, and priorities that shape your finance operations, streamlining high-value activities across the board. Whether you're accelerating collections, optimizing pricing strategies, or detecting anomalies, AI Studio empowers you to automate what matters most—reducing manual effort, increasing agility, and fueling data-driven strategies throughout the revenue lifecycle.

### Key Features

- ✓ Automate high-value financial processes
- ✓ Personalize predictive analytics and reporting
- ✓ Reduce manual effort and increase agility

## Future-Proof Your AI Investment

As your business evolves, so should your AI. AI Studio supports ongoing refinement, ensuring your models continue to reflect current priorities, processes, and data structures. Whether you're responding to shifting market demands, regulatory changes, or internal growth, you can update and expand your AI capabilities without rebuilding from scratch. With a flexible, scalable foundation, AI Studio helps you stay ahead—delivering continuous value today and future-ready intelligence for tomorrow.

### Key Features

- ✓ Continuously update models as business needs change
- ✓ Respond quickly to market, regulatory, and operational shifts
- ✓ Scale AI capabilities without rebuilding from scratch

## AI Built for Your Business

AI Studio helps finance teams tailor artificial intelligence to reflect how their organization actually operates, ensuring that AI delivers insights and automation aligned with their unique processes, priorities, and data. Whether it's supporting natural language reporting, forecasting revenue, or surfacing deep financial insights, AI Studio adapts to your business, not the other way around.
