

AI Powered Admin

Automate your Configuration with Natural Language

With BillingPlatform's RevenueIQ AI suite, accounting teams can work smarter and faster with contextual AI that works as a productivity partner, transforming natural language into automated business processes that work seamlessly in the application. You simply describe what you want to automate and let AI turn those ideas into action, helping your organization adapt faster, reduce manual effort, speed up day-to-day operations and unlock new monetization opportunities.

Key Benefits

Boost operational agility and scale your finance processes efficiently

Instantly turn ideas into automated business processes using natural language

Enable innovation through AI-driven automation tailored to your business

Reduce configuration complexity and minimize IT dependence

Rapidly launch and iterate pricing, rating and billing logic for faster time to market

Core Capabilities

→ AI-Powered Workflow & Formula Creation

BillingPlatform simplifies the way you build and understand formulas and workflows—using natural language through an intuitive chat interface. Ask what a workflow or formula does, and it breaks it down in plain terms. Describe what you need, and it automatically generates product rating methods, revenue recognition rules, validations and step-by-step workflows—turning your ideas into automation in seconds.

Key Features:

- ✓ Build workflows and formulas via conversational prompts
- ✓ Ask AI to explain existing business processes and rules in plain language
- ✓ Reduce manual tasks and accelerate delivery

→ Operational Agility at Scale

Adapt faster to changing business needs with AI that simplifies the creation and modification of business rules and processes. BillingPlatform helps accounting teams respond quickly to market shifts, scale operations efficiently and drive innovation without the need for manual configuration.

Key Features:

- ✓ Rapidly adapt to market shifts
- ✓ Scale efficiently with AI-powered configuration
- ✓ Empower teams to innovate and execute faster

→ Monetization Made Easy

With AI-driven automation, BillingPlatform empowers teams to quickly launch, adapt and optimize pricing, rating, billing logic and more. This enables faster time to revenue and the flexibility to seize new monetization opportunities as they emerge.

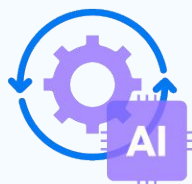

Key Features:

- ✓ Shorten the time to market for new billing logic
- ✓ Flexibly adapt monetization models as business needs evolve
- ✓ Automate pricing and rating changes with confidence

Unlock the Value of AI-Driven Configuration

BillingPlatform gives accounting teams the power to build, explain and optimize complex processes quickly—reducing manual effort and unlocking new agility and innovation across your revenue lifecycle management operation.
