

Accounts Receivable Automation

Accelerate Cash Flow with Intelligent AR Automation

Efficient accounts receivable processes are essential for maintaining an enterprise's healthy cash flow and ensuring customer satisfaction. Unfortunately, nearly 80% of businesses struggle with manual accounts receivable (AR) processes, which are error-prone, time-intensive and can lead to customer dissatisfaction.

BillingPlatform's AR Automation solution unifies invoicing, payments, collections and analytics in a single platform to reduce DSO, curb revenue leakage, unlock working capital and optimize your customers' experience.

BillingPlatform AR Automation Solution

Invoicing

- ✓ E-invoicing
- ✓ Real-time invoicing
- ✓ Auto-create & send

Digital Payments

- ✓ Native or 3rd party
- ✓ Smart retries
- ✓ Multi-currency

Collections

Key Benefits

- ✓ **Increase cash flow and shorten DSO** with automated invoicing and payments
- ✓ **Reduce revenue leakage** by minimizing errors and improving payment efficiency
- ✓ **Improve data accuracy** with AI-powered reporting and analytics to deliver better forecasting and insights
- ✓ **Unlock working capital** by freeing up trapped funds through faster collections
- ✓ **Increase customer satisfaction** with self-service customer portals
- ✓ **Achieve higher payment conversion rates** by providing customers flexible payment options

Core Capabilities

Automated Invoicing

BillingPlatform scales effortlessly with your business, integrating billing data either natively within BillingPlatform or through a trusted third-party. This enables real-time generation of accurate invoices based on customer billing information, automates invoice creation and distribution with precision and ensures compliance while simplifying complex reporting through built-in E-Invoicing capabilities—all designed to enhance financial transparency and operational efficiency.

Digital Payments

With PCI Level 1 compliance, BillingPlatform ensures secure, seamless transactions through hosted payment pages or customer portals. It integrates natively with BP Pay or trusted third-party gateways to deliver a tailored payment experience, offering flexible options such as digital wallets, bank transfers, direct debit and credit cards. The solution reduces transaction failures with automated smart retries and supports global compliance with fraud prevention mandates and multi-currency capabilities.

Collections Management

Unify your collections, debt management, billing, dunning and payment processing into a single, automated platform. BillingPlatform helps you stay on top of outstanding debt with real-time updates and prioritized account actions, while enabling flexible dunning strategies that combine automated and manual steps for effective recovery. The solution also streamlines operations by allowing seamless data sharing with external collection agencies to accelerate resolution.

Cash Application

Simplify your cash reconciliation through real-time updates and automated processes, helping unlock working capital and reduce manual effort. BillingPlatform enables fast, accurate matching of payments to invoices, improves cash flow with precise charge-level allocation and enhances visibility into payment status and outstanding invoices for better financial control.

Customer Self-Service Portal

Enhance your customers' experience by providing 24/7 self-service portal access to real-time account information, enabling users to view invoice details, transaction history and choose from multiple secure payment options to stay current. With highly tailorable bill presentment, integrated hosted payment pages for a seamless and secure checkout experience, and customizable branding, the portal empowers your business to deliver convenience while reinforcing your brand identity.

AI-Powered Reporting

BillingPlatform delivers robust reporting capabilities that provide the agility and flexibility to analyze billing and usage data across your organization. Scalable AI tools surface insights around outstanding invoices, sales trends, cash flow, AR and AP forecasting and bank transactions. With an AI Report Builder that enables users to get answers in seconds and intuitive graphical dashboards for at-a-glance analysis, the solution empowers smarter, faster decision-making.

Why Choose BillingPlatform's AR Automation?

Unified, Automated AR in One Platform

Single platform to unify, automate and streamline your accounts receivable process.

- ✓ All payments, one platform
- ✓ No swivel-chair reporting
- ✓ Automated workflows

Extensible Data Model

No code, point-and-click configurability to meet your exact accounts receivable requirements.

- ✓ Do business your way
- ✓ Complete flexibility
- ✓ Limited IT involvement required

Enterprise-Grade Scalability

A platform that grows with you as you add new products or expand into new markets.

- ✓ Future-proof your financial systems
- ✓ High volume transactions
- ✓ Global support
