

Predictive Insights

Predict and Respond to What's Next.

BillingPlatform's RevenueIQ AI suite transforms your finance data into forward-looking intelligence. By combining predictive analytics and AI models trained on internal and external data, BillingPlatform's predictive insights help you anticipate risks, reveal opportunities and drive smarter, faster decision-making, empowering accounting teams to stay ahead of whatever is next.

Key Benefits

Unify internal and external data for connected financial intelligence

Anticipate risk, revenue, cash flow, demand and more with predictive forecasting

Drive smarter, proactive financial decisions across your revenue lifecycle

Automate action based on AI-powered insights

Core Capabilities

Connected Financial Intelligence

Harness all your finance data, internal and external, to reflect the full scope of your business. By unifying this information, BillingPlatform generates a more complete, accurate and connected view of your financial landscape across billing, payments, usage and beyond—equipping CFOs to make faster, smarter data-driven decisions at every stage of the revenue lifecycle.

Key Features:

- ✓ Unify data from billing, payments, usage, and more
- ✓ Create AI models tailored to your business and financial environment
- ✓ Enable a 360-degree view for finance leaders

→ Predictive Forecasting

Gain forward-looking insight through predictive analytics that surface key financial indicators—including churn risk, cash flow volatility, revenue fluctuations and evolving customer demand. BillingPlatform gives CFOs and accounting teams the visibility necessary to detect anomalies, reveal patterns, anticipate emerging trends and identify areas of opportunity or concern. With this intelligence, organizations can proactively mitigate risk, unlock working capital, enhance forecasting precision and drive stronger strategic and financial outcomes.

Key Features:

- ✓ Predict financial risks and opportunities
- ✓ Reveal trends and anomalies across revenue operations
- ✓ Improve the accuracy of forecasts for better planning

→ Automation That Drives Action

Transform predictive insights into measurable business outcomes with intelligent automation that adapts to your unique data, business rules and operational processes. Whether it's triggering collections workflows, prioritizing high-risk accounts, adjusting pricing strategies or streamlining dunning, BillingPlatform eliminates guesswork and reduces manual intervention. This automation empowers accounting teams to operate with greater precision, agility and consistency—ensuring your revenue lifecycle management stays proactive, not reactive.

Key Features:

- ✓ Automate actions based on predictive signals
- ✓ Reduce manual intervention and accelerate processes
- ✓ Empower finance teams to operate with agility and precision

Harness the Power of Predictive AI

BillingPlatform helps finance leaders harness predictive analytics and automation to uncover patterns, mitigate risks and drive better business outcomes. Turn your finance data into an engine for smarter, faster forward-looking decisions.
