

Revolutionize Your Revenue Management

In today's subscription and usage-based economy, managing revenue streams has become more complex than ever. BillingPlatform Revenue Recognition offers an automated, flexible and auditable solution to streamline your revenue management processes.

What BillingPlatform Revenue Recognition Does

Simplify Revenue Recognition

BillingPlatform Revenue Recognition automates the entire revenue recognition process, ensuring compliance with ASC 606 and IFRS 15 standards. Our system ingests all your billing and transaction data from upstream CRM and billing systems, generates revenue contracts, manages contract amendments, allocates revenue across bundled items and automates revenue recognition seamlessly.

Transform Billing Data into Insights

With tools designed to help you understand trends and insights in your accounting data, BillingPlatform Revenue Recognition ingests invoice, payment, and credit data to create all related accounting journal entries. Our platform guides users through the month-end close process, ensuring your books are accurate while adhering to internal controls.

Value to Customers

Predictable Revenue Streams, Simplified Processes

BillingPlatform Revenue Recognition enables businesses to handle complex recognition models with ease. By simplifying the quote-to-cash process and offering scalability, our platform provides improved financial health visibility and aids in strategic decision-making.

Scalable and Efficient

From small businesses to large enterprises, BillingPlatform Revenue Recognition is designed to scale with your growth, ensuring that you can process and compute large volumes of data efficiently.

How BillingPlatform Revenue Recognition Works

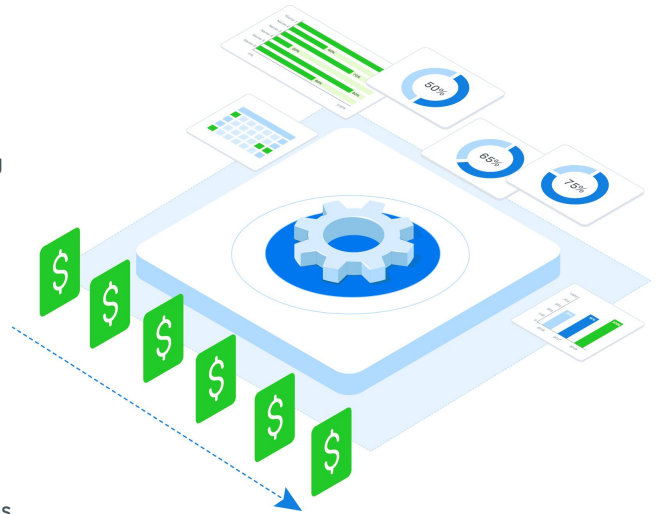

Automated Precision

Move Beyond Manual Processes

Our rule-based engine automates revenue scheduling, allowing you to manage transaction complexity effortlessly. Automate multi-element revenue allocation, standalone selling price (SSP) calculations and compliance requirements.

Automate Revenue Scheduling

- ✔ Create bundled arrangements
- ✔ Determine SSP with formula-based calculations
- ✔ Update contract transaction prices from estimations
- ✔ Allocate transaction prices to performance obligations
- ✔ Configure business logic for GL entries

Accurate Reporting

Expand Your Business with Confidence

Gain actionable insights into your revenue recognition quickly and easily. Process high volumes of data and transactions with real-time revenue reporting, ensuring accuracy and speed.

Performance and Accuracy

- ✔ Book 2.3M GL entries per hour
- ✔ Real-time revenue assignment and recognition

Audit with Ease

Meet the Highest Standards

Our rule-based engine automates revenue scheduling, allowing you to manage transaction complexity effortlessly. Automate multi-element revenue allocation, standalone selling price (SSP) calculations and compliance requirements.

Automate Revenue Scheduling

- ✔ Track changes and user activities
- ✔ Manage multi-book accounting for various standards
- ✔ Eliminate data entry replication and manual intervention

Integration with Other Systems

Seamless Integration Capabilities

Flexible Integration Methods

BillingPlatform Revenue Recognition offers flexible integration options, whether fully automated via API or through one-off file-based methods. Our platform can integrate with multiple data sources, including orders, quotes and invoices from various systems.

Ingest and Consolidate Data

Sync with customer data and ingest invoices, ensuring a unified approach to revenue recognition. Our system adapts to your data structures, translating them into actionable insights.

Tailored Integration

- API or file-based integration
- Multiple data sources and types
- Translate and unify data for seamless revenue recognition
