

Revenue Lifecycle Management for Healthcare Logistics Providers

The Healthcare Logistics industry faces unique billing challenges, including managing complex pricing structures, high-stakes shipping requirements and disconnected legacy systems. Logistics providers need a billing solution that can handle everything from bundled shipments and variable rate structures to usage-based services and regional shipping fees.

BillingPlatform offers a robust solution tailored to the Healthcare Logistics industry, enabling accuracy, speed and cost-efficiency across all billing processes.

BillingPlatform Supports Healthcare Logistics

- Support tiered, bundled, and volume-based pricing models
- Automate invoicing and streamline order-to-cash processes for high-priority, high-complexity shipments
- Track and bill for shipping and handling fees based on weight, temperature control, urgency and geographic region
- Integrate with legacy systems and external platforms to prevent revenue leakage
- Handle high volumes of usage-based data with built-in mediation, de-duplication and real-time routing features

Transparent and accurate billing enhances customer trust, potentially increasing retention rates by 10–20%*
