

A Single Quote-to-Cash Solution for Healthcare Software & Technology

The Healthcare Software industry faces distinct billing challenges driven by the complexity of modern pricing models, the limitations of legacy systems and the need to integrate with a wide range of healthcare and enterprise platforms. As companies scale, these issues only intensify—putting pressure on teams to reduce manual effort, adapt quickly and maintain accuracy.

BillingPlatform offers a purpose-built solution that helps healthcare software companies modernize their billing operations—without compromising compliance, flexibility or control.

BillingPlatform Supports Healthcare Software/Tech

- Support modern pricing models—including subscriptions, usage-based billing, and tiered pricing—all on a single platform
- Replace manual processes and disconnected spreadsheets with a centralized, automated billing engine
- Scale confidently with multi-entity, multi-currency and multi-region capabilities to support expansion and acquisitions
- Integrate seamlessly with CRMs, ERPs, and EHR platforms to eliminate billing gaps and ensure data integrity

Customer Profile

“BillingPlatform combines an intuitive, modern architecture with the flexibility to let us configure it to our business needs and the ability to automate invoice processing rather than get delayed by manual processes.”

KIPUHealth[®] **Eddie Aja,**
CFO

No matter what type of software you provide to the Healthcare space, your billing needs are only getting more complex. BillingPlatform gives you the flexibility to support any pricing model, the scalability to grow across regions and product lines, and the automation to eliminate costly errors and inefficiencies.
