

Revenue Lifecycle Management for Conferencing & VoIP Providers

Real-time communications require real-time billing agility. VoIP and conferencing providers need flexible, automated billing systems to support dynamic usage, international pricing and partner billing at scale.

A Single Quote-to-Cash Solution for the Conferencing & VoIP Industry

Conferencing and VoIP providers face complex billing challenges tied to per-minute usage, global coverage and multi-party contracts. Legacy systems often can't keep pace with dynamic pricing, reseller relationships or the volume of usage data generated.

BillingPlatform enables communications providers to modernize their quote-to-cash process—improving billing accuracy, reducing operational overhead and supporting global scalability.

62% of firms that implemented accounts receivable automation reported improvements in Days Sales Outstanding (DSO), enhancing cash flow and reducing manual workload
