

DATASHEET

RevenuelQ®

Smarter Decisions. Faster Outcomes.
Fully Connected Financial Intelligence.

RevenuelQ is BillingPlatform's AI suite that brings together embedded conversational AI and custom-trained models to transform how finance teams operate. By combining the power of AI with the precision of billing data, RevenuelQ helps uncover insights, automate operations and align intelligence to the way your business works.

Core Capabilities

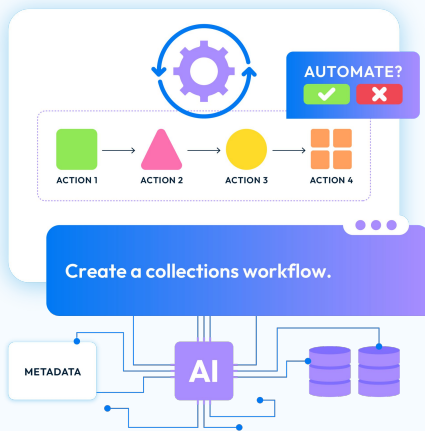

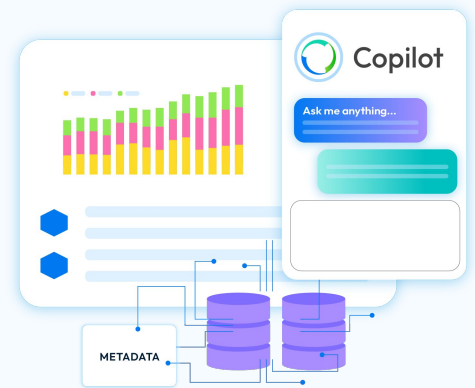

Copilot

Conversational access to your platform

Copilot is your AI-powered assistant that transforms how you interact with your data and navigate the platform using natural language. Whether you're creating reports or asking how to complete tasks, Copilot delivers fast, intuitive access to help content, analytics and insights—tailored to your configuration to help boost productivity and efficiency.

Key Features

- ✓ Navigate and ask questions with natural language
- ✓ Instantly generate reports and visualize data
- ✓ Get context-aware help based on your processes

AI-Powered Admin

Automate configuration with natural language

Get contextual AI-powered productivity assistance by describing what you want to automate—business rules, calculations, processes—and AI takes care of the rest to generate new workflows and formulas. Streamline configuration, reduce manual effort and transform ideas into actionable results so your team can focus on high-priority, strategic initiatives.

Key Features

- ✓ Generate new logic and processes through natural language
- ✓ Ask AI to describe existing workflows and formulas
- ✓ Increase agility to capitalize on monetization opportunities

Predictive Insights

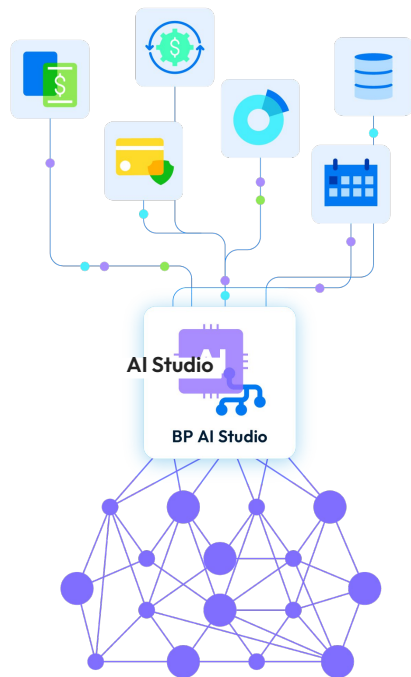

Predict and respond to what's next

Empower business users with predictive analytics trained on your internal and external data to uncover deep insights and anticipate future opportunities, from forecasting churn to optimizing collections and automating cash application. Armed with forward-looking intelligence, finance teams can reduce risk, unlock working capital and deliver stronger outcomes across the revenue lifecycle.

Key Features

- ✓ Forecast key financial metrics like cash flow and demand
- ✓ Automate proactive steps based on predictive outcomes
- ✓ Uncover risks and opportunities across the revenue lifecycle

AI Studio

Train AI to fit your business

AI Studio lets you deploy pre-trained AI models or create and train your own using your unique data, configuration and business rules—powering BillingPlatform with more relevant, precise results. From natural language reporting to anomaly detection and predictive forecasting, it helps your team make faster, smarter decisions. Built to adapt and evolve with your business, AI Studio delivers AI that works the way you work.

Key Features

- ✓ Use pre-trained models or create your own
- ✓ Predict risks and opportunities, detect anomalies and surface patterns in your data
- ✓ Future-proof your AI investment

Unlock the Value of Billing Data

Your billing system contains a rich stream of customer and financial data—from usage patterns and payment history to transaction trends and service configurations. RevenueIQ taps into this data to deliver connected financial intelligence that drives better decisions, faster responses, and greater value.
