

BP Copilot

BP Copilot streamlines billing operations by combining intelligent reporting with intuitive platform navigation. Instantly access critical business data by asking in your own language, and leverage AI to generate detailed, organized reports—helping you make faster decisions and gain deeper insights with ease.

There are **4 major benefits** that come with using BP Copilot:

-80%

Organizations that deploy AI-powered analytics can **reduce report generation time by as much as 80%**. This dramatic efficiency gain means that decision-makers can access critical insights in a fraction of the time compared to traditional methods. (IBM)

Faster Decision-Making

Companies that incorporate AI into their decision-making processes **experience up to a 40% improvement in decision speed**. Faster decisions allow these organizations to be more agile, adjusting strategies in real time and maintaining a competitive edge in dynamic environments. (Accenture)

+40%

Improved Operational Efficiency

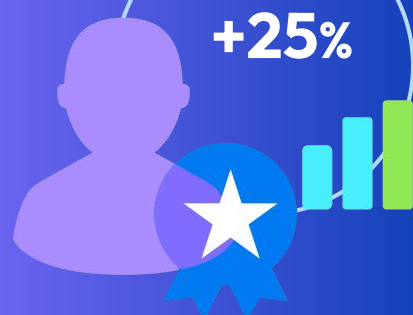

Integrating natural language interfaces into enterprise applications can **cut query resolution times by up to 50%** compared to traditional, menu-driven search methods. This means that when users ask for help in plain language, they get faster responses—making it easier to navigate complex billing systems. (Gartner)

+50%

Enhanced User Satisfaction

Natural language querying simplifies data retrieval and reduces the cognitive load on users, **resulting in up to a 25% improvement in overall satisfaction**. By allowing users to ask questions in plain language, these systems enhance ease of use and foster a more satisfying experience. (Gartner)

+25%

Unlock a **new era in business intelligence** where AI transforms how you work.

By streamlining report generation, empowering rapid decisions, optimizing operations, and creating an intuitive experience, BP Copilot redefines efficiency and paves the way for smarter business outcomes.
